

PERFORMANCE 6.3 ER P / 6.3 ER I

Performance Line steam generators with automatic (external) water recharge stand out for the innovative and attractive design, the ease of use and above all for the outstanding performance. The high resistances power, the 6 bar operating pressure together with the 1200 W vac motor guarantee top performance. The high water tank capacity (8l) ensures up to 4h non-stop running time. The high steam operating temperature the machine can reach (up to 126 °C) and the plated stainless steel resistances (low porosity, higher resistance to limestone) complete the set of remarkable technical which make this machine something unique in the market.

Available in both the plastic and stainless steel versions and with a wide range of standard and optional accessories.
